Flag Printing Techniques

Roll-on-Reverse: Screen-printing of a one-color reverse image on the back side of flag. Typically used with one-color imprints on dark Nylon.

Double-Faced Flag: Two flags are sewn together with a liner. Image will read correctly on both sides.

Penetrated Print: Typically printed on a white Nylon allowing ink to penetrate through to the back side of flag for a reverse read.

NOTE: Shipping dimensions and weights are approximate and provided for a basic reference only. They may vary when actually shipped.
