

RKUSA5W12 - How to Assemble and Install 5' Wood Flagpole Set

Contents:

- 2.5' x 4' U.S. Flag with sleeve
- 5' wood flagpole with ball ornament
- One flag clip and non-tangle ring
- Two position bracket holder
- Hardware (screws to mount holder to house and secure non-tangle ring to pole)

Mount Bracket:

Mount flag-holder bracket on vertical or horizontal surface with the four screws included in your set. If mounting to brick or masonry, pre-drill holes, insert plastic screw anchors in holes and be sure screws are as tight as possible.

Attach Flag:

Anti-furl ring should be located under ball ornament of pole. Secure anti-furl ring to pole with set screw (may be plastic screw or metal thumbscrew). Slide sleeve with union (navy field with stars) to top of pole. Tab inside pole sleeve will have a precut slit. Press hook to open and attach tab with slit to flag clip on pole.

Insert pole into bracket in either the 45 degree angle for flag flying or the 90 degree angle for displaying as a vertical banner.

For best results, remember to take flag set down during periods of rain, winds and other inclement weather to help prolong life.

Care instructions: Machine wash flag in cold water. Lay flat or hang to dry. Do not put in dryer or fold while wet.
